2018 DAYTIME EMMY AWARDS CO-PRESENTERS**

New York, NY, April 16, 2018 – David Osmond, the Daytime Emmy-nominated host of the hit kids’ and family show, *Wonderama*, has been chosen to co-present alongside his famous aunt and entertainment giant, Marie Osmond, during the 2018 Daytime Emmy Awards, it was announced today. David, who received his very first Emmy nod in the category of Outstanding Host in a Lifestyle/Travel/Children’s or Educational Series, will now do double -duty --- as nominee and presenter during the show, which will be presented on several platforms live from the Pasadena Civic Auditorium on Sunday, April 29th.

As host of Wonderama, David taps into his considerable talents to welcome an array of guests on the E/I (Educational/Informational) compliant series. Each week, the popular syndicated showcase offers a blend of musical artists, science demonstrations, cooking segments, messy games, fun facts and surprise celebrity guest appearances. Behind the scenes, a proven roster of Emmy Award-winning television pros oversees all facets of production, marketing and distribution, along with Osmond, who also serves as Wonderama’s co-executive producer along with Chuck Armstrong, CEO for Wonderama Holdings, LLC.

“Everyone at Wonderama is elated to see our beloved host, David Osmond, not only receive recognition as a Daytime Emmy nominee but also being asked to serve as a presenter with his incredibly talented aunt, Marie Osmond,” explains Chuck Armstrong, CEO of Armstrong Interactive Inc. “Thanks in no small part to David, Wonderama has caught on with fans of all ages and I’m so grateful to have our dedicated and talented team bring their strong work ethic and approach to the all-new Wonderama. Congrats to all nominees.”

Wonderama is available in wide national syndication through alliances with FOX, Tribune, Gray, Nexstar, Scripps and OTA broadcast groups and the family-friendly series is also offered alongside one-of-a-kind bonus content through WonderamaTV.com and brand extensions across a variety of social media platforms.
