

Name: _____

Subject: Science/Chemistry/Physics

Key Concepts: Pressure, Sublimation

Draw it Out: Feel the Pressure!

Watch the Wonderama Video on YouTube: [Scientist Chase Wiley Feels the Pressure](#)

(If needed, use the video title to search for this video)

Words to Learn

Carbon Dioxide: a gas made of one atom of carbon and 2 atoms of oxygen

Dry Ice: frozen carbon dioxide that became solid at -110 degrees

Sublimation: the process by which a solid turns into a gas

Pressure: the amount of force placed on something

Draw It!

Choose one moment to draw. Circle the moment you choose.

1. Draw what happened after Chase put dry ice and hot water in the beakers and sealed them with gloves.
2. Draw what happened after Chase put dry ice and hot water into the small containers and turned them upside down.
3. Draw what happened after Chase put dry ice and hot water into a soda bottle and poured ping pong balls on it.
